

## NLII-CO2+T | Combined CO<sub>2</sub>/T sensor

Combined sensor NLII-CO2+T is used to continuously monitor air quality inside buildings and then control ventilation (HVAC) systems according to current levels of internal air quality. The sensor measures concentration of carbon dioxide (CO<sub>2</sub>) and temperature (T). It is suitable for offices, classrooms, shopping centers, homes, restaurants, fitness centers, commercial buildings, etc.

- › measures CO<sub>2</sub> and T
- › 2x analog voltage/current output
- › maintenance during operation is not required
- › long life and stability

The measuring of CO<sub>2</sub> is based on the principle of infrared radiation attenuation dependence on the CO<sub>2</sub> concentration in the air (NDIR). Built-in auto-calibration function ensures very good long term stability.

The sensor has built-in two separate analog outputs - one for the actual concentration of CO<sub>2</sub> and the other for actual temperature.

So the sensor efficiently manages ventilation and heat recovery units, based on current room air quality.

The current air quality can easily be determined by looking at the three LED indicators.

The **eco** level means good indoor air quality necessary to achieve a sense of well-being and at the same time optimal energy costs for heating, ventilation or air conditioning.

| Parameter                       | Value                    | Unit  |
|---------------------------------|--------------------------|-------|
| Supply voltage range            | 12 – 35                  | V DC  |
|                                 | 12 – 24                  | V AC  |
| Average consumption             | 0,5                      | W     |
| CO <sub>2</sub> measuring range | 400 – 2000               | ppm   |
| CO <sub>2</sub> accuracy        | ± 35 ppm ±5 % of reading |       |
| CO <sub>2</sub> rate rise       | max 1                    | min   |
| CO <sub>2</sub> step response   | (90 %) 80                | s     |
| T measuring range               | 0 – 50                   | °C    |
| T accuracy                      | ± 0,4 °C                 |       |
| Working humidity non condensing | 0 – 95 %                 | RH    |
| Working temperature             | 0 to +50                 | °C    |
| Storage temperature             | -20 to +60               | °C    |
| Expected lifetime               | min. 10                  | years |
| Ingress protection              | IP20                     |       |
| Dimensions                      | 90x80x31                 | mm    |

Explanation of abbreviations and technical terms can be found on our website in the [Glossary](#) section.
